SUMMARY

Aspiring full stack and data science professional with hands-on experience in Python, Django, Flask, SQL, machine learning, and responsive web application development.

EDUCATION

Sanjivani College of Engineering, Kopergaon

2020 – 2024

Bachelor of Technology (B.Tech.) in Information Technology

INTERNSHIP EXPERIENCE

Software Development Intern

07/2024 – 07/2025

San Jose Automation

- Built and maintained Flask/Django web applications with backend validation and data handling.
- Developed scripts to extract, preprocess, and upload structured data into the database.
- Used Git and GitHub for version control, branching, and collaboration.

Data Engineering Intern

03/2023 – 06/2023

Celebal Technologies

- Processed and cleaned large datasets using PySpark and Databricks.
- Created Power BI reports and dashboards for analysis and business insight.
- Assisted in ETL workflows and supported data quality checks.

Full Stack Data Science Trainee

07/2023 – 06/2024

Sanjivani AI Technologies

- Worked on end-to-end projects involving data collection, preprocessing, model building, and evaluation.
- Built ML-based solutions with Python and integrated them into web interfaces.
- Developed text classification and relevance assessment workflows.

PROJECTS

Hotel Orders Management System

Django, HTML, Bootstrap, JavaScript

- Built a full-stack web app to manage menu items, customer orders, kitchen updates, billing, and payments.
- Implemented role-based access for admin, staff, and kitchen users using Django authentication.
- Designed responsive UI pages with Bootstrap and JavaScript for validation and dynamic order updates.
- Used Django ORM for secure database operations with models, views, templates, and static assets.

Car Price Prediction

Python, Flask, Machine Learning

- Collected and cleaned vehicle listing data, handled missing values, and performed feature engineering.
- Built a regression-based prediction model to estimate car prices from input features.
- Created a Flask web interface for real-time prediction and user interaction.
- Deployed the application on VPS hosting using Gunicorn and Nginx.

Healthcare Assistance Chatbot

Python, Flask, NLP

- Built an AI-powered chatbot to provide basic healthcare guidance and symptom-based suggestions.
- Implemented NLP techniques for intent recognition and medical query processing.
- Designed a responsive web interface for real-time user interaction and conversation handling.
- Integrated backend logic for maintaining chat history and response management.

SKILLS AND EXPERTISE

Languages Python, SQL, HTML5, CSS3, JavaScript, Basic C

Web Development Django, Flask, Bootstrap 5, REST Concepts, AJAX, Form Validation

Machine Learning & Data Science Pandas, NumPy, Matplotlib, Scikit-learn, Feature Engineering, Model Evaluation

Databases SQLite, MySQL, PostgreSQL, Django ORM, Database Design

Cloud & Deployment VPS Hosting, Linux, Gunicorn, Nginx, Environment Variables, Static Files

Tools Git, GitHub, Jupyter Notebook, VS Code, Power BI, Databricks, PySpark

CERTIFICATIONS

- Data Analytics Training – Godrej Infotech in association with Centum Foundation
- Data Science: Python – Udemy
- Crash Course on Python – Coursera

ACHIEVEMENTS

- First prize in the Hack-a-Bot competition organized by Ui Path Academy.
